- IGES/VDA-FS
- VDA-FS
- Delcam DGK

- IGES
- Parasolid
- STEP
- DMT/ DGK
- STL

PS-Exchange is a unique CAD data translator and interoperability solution that can reduce your data translation costs and delays.

Download PS-Exchange from [www.delcam.com](http://www.delcam.com) and Start Translating.

Translating files between different CAD systems couldn't be easier. Simply download PS-Exchange from [www.delcam.com](http://www.delcam.com) and perform translations straight away using our pay-per-use voucher system. Vouchers are available for all of our available file types at a fixed standard cost of \$50 or 50 Euros, no matter what the file size or complexity of the part. All translations are performed on your desktop and no part data is transferred to Delcam or any other party.

### Free Viewer

PS-Exchange includes a free viewer so you can view translations for all formats **before** paying to save them.

### Payment Options

Frequent users of PS-Exchange can upgrade from our standard voucher system by opening an account with us, enabling you to receive discounts on translations, or purchase a full licence enabling you to perform unlimited translations.

Delcam's Data translators are developed in house, so you can be sure of the usual high quality product that Delcam offers throughout it's PowerSolution range.

For more information, FAQ's and to download the latest version of PS-Exchange, go to [www.delcam.com](http://www.delcam.com)

*"PS-Exchange is a great program. It has allowed us to translate all of the data we receive from different sending systems. We receive many different types of data from our customers which we can now export into most generic formats such as IGES and Parasolids as well as others".*

Mario Donaldson, Systems Administrator, Concours Mold Inc.

All current and future formats are being constantly developed and improved by our dedicated team to always provide you with the best translators available.
